## PROFILE

Computer Science and Engineering graduate with hands-on experience building full-stack web applications using Java, Node.js, React.js, and MongoDB. Shipped production-ready projects with Docker, AWS ECS, and REST APIs. Strong foundation in Data Structures and Algorithms (500+ problems solved, LeetCode rating 1726). Actively seeking SDE / backend engineering roles where I can contribute to scalable system design and real-world product development.

## SKILLS

**Programming Languages:** Java, JavaScript, Python, SQL

**Backend:** Java, Node.js, Express.js, REST APIs, JWT/RBAC

**Frontend:** React.js, HTML, CSS, Tailwind CSS, Bootstrap

**Databases:** MongoDB, MySQL

**DevOps & Tools:** Docker, AWS (EC2, S3, ECS), Git/GitHub, Postman, Linux

## PROFESSIONAL EXPERIENCE

**Lighthouse Info Systems Pvt Ltd**, *Software Engineer Intern*

May 2025 – July 2025 | Nagpur, India

- Developed backend modules for **product management**, **cart operations**, and **order processing** using **Node.js**, **Express.js**, and **MongoDB**.
- Implemented **JWT-based authentication** and **role-based access control (RBAC)**, and designed **REST APIs** with optimized **MongoDB** schemas for scalable workflows.
- Built end-to-end **order lifecycle management** with input validation and structured error handling, ensuring reliable API responses across all endpoints.
- Technologies:** Node.js, Express.js, MongoDB, Mongoose, JWT, REST APIs, Postman

## PROJECTS

**Real Time Collaborative Editor** 

- Implemented real-time collaborative editing with Monaco Editor using **Yjs CRDT** synchronization and **Socket.io**, enabling **15+ concurrent users** to edit shared documents simultaneously.
- Built room-based collaboration and active user presence tracking using **React Router** and **WebSockets**, with dynamic room codes validated through multi-user **Playwright testing**.
- Containerized with **Docker** and deployed on **AWS ECS**, enabling cross-device real-time collaboration with a production-ready deployment workflow.
- Technologies:** React.js, Node.js, Express.js, Socket.io, Yjs, Monaco Editor, Tailwind CSS, Docker, AWS ECS

**Hacker News Scraper** 

- Built a full-stack Hacker News scraper using the **MERN stack**, scraping and storing **100+ stories** from Y Combinator's Hacker News using **Axios** and **Cheerio**.
- Implemented **JWT authentication**, protected **REST APIs** across **6+ endpoints**, and **React Context API** for authentication state management.
- Developed a bookmark system with optimized frontend-backend integration, achieving **sub-200ms API response times** validated via **Postman**.
- Technologies:** Node.js, Express.js, React.js, MongoDB, JWT, Cheerio, Axios, REST APIs

## EDUCATION

**B.Tech. in Computer Science and Engineering**,

2022 – 2026 | Bharatpur, India

*Government Engineering College Bharatpur, CGPA: 8.64*

*Relevant Coursework:* Data Structures & Algorithms, Database Management Systems (DBMS), Computer Networks, Operating Systems, Object-Oriented Design, Software Development Life Cycle (SDLC).

## ACHIEVEMENTS AND ACTIVITIES

- Competitive Programming:** Solved 500+ problems across LeetCode, CodeChef, and GFG; LeetCode peak rating 1726.
- Coordinator, Python Programming Club:** Organized coding workshops and sessions for 50+ students at GEC Bharatpur.
