PROFILE

Final-year Computer Science and Engineering undergraduate with hands-on experience in Java and JavaScript (MERN stack). Proficient in backend development, REST APIs, and DevOps practices including containerization using Docker. Experienced in building scalable full-stack applications with a focus on performance. Comfortable working in macOS/Linux environments and familiar with open source tools and cloud platforms. Actively solving problems on LeetCode to strengthen Data Structures and Algorithms skills.

SKILLS

Programming Languages: Java, JavaScript, SQL

Backend: Node.js, Express.js, REST APIs, JWT/RBAC

Frontend: HTML, CSS, Tailwind CSS, Bootstrap, React.js

Databases & DevOps: MongoDB, MySQL, Docker, Git/GitHub, Postman, AWS (EC2, S3)

PROFESSIONAL EXPERIENCE

Lighthouse Info Systems Pvt Ltd, *Software Engineer Intern*

May 2025 – July 2025 | Nagpur, India

- Developed **backend modules** for **product management, cart operations, and order processing** using **Node.js, Express.js, and MongoDB**.
- Implemented secure **JWT-based authentication and authorization** while designing **REST APIs** and optimized database schemas for scalable application workflows.
- Engineered **order lifecycle management** with validation, error handling, and reliable API integration for consistent backend functionality.
- Technologies:** Node.js, Express.js, MongoDB, Mongoose, JWT, REST APIs, Postman

PROJECTS

Real Time Collaborative Code Editor

- Implemented **realtime collaborative code editing** with Monaco Editor using **Yjs CRDT synchronization** and **Socket.io**, enabling **15+ concurrent users** to edit shared documents simultaneously.
- Built **room-based collaboration** and **active user presence tracking** using React Router, WebSockets, and dynamic room codes validated through multi-user testing.
- Containerized the application using **Docker** and deployed scalable services on **AWS ECS**, enabling cross-device realtime collaboration and production-ready deployment workflow.
- Technologies:** React.js, Node.js, Express.js, Socket.io, Yjs, Monaco Editor, Tailwind CSS, Docker, AWS ECS

Hacker News Scraper

- Built a full-stack Hacker News scraper using the MERN stack, scraping and storing **100+ stories from Y Combinator's Hacker News** using **Axios** and **Cheerio**.
- Implemented JWT authentication, protected REST APIs across **6+ endpoints**, and **React Context API** for authentication state management.
- Developed a bookmark system with optimized frontend-backend integration and **sub-200ms local API** response times tested via Postman.
- Technologies:** Node.js, Express.js, React.js, MongoDB, JWT, Cheerio, Axios, REST APIs

EDUCATION

B.Tech. in Computer Science and Engineering,

2022 – 2026 | Bharatpur, India

Government Engineering College Bharatpur, CGPA: 8.67

Relevant Coursework: Data Structures & Algorithms, Database Management Systems (DBMS), Computer Networks, Operating Systems, Object-Oriented Design, Software Development Life Cycle (SDLC).

ACHIEVEMENTS AND ACTIVITIES

- Competitive Programming:** Solved 500+ problems across LeetCode, CodeChef, and GFG; LeetCode peak rating 1637.
- Coordinator, Python Programming Club:** Organized coding workshops and sessions for 50+ students at GEC Bharatpur.
